USU Online Launches New Website

USU Online

10/18/2019

The website features a new degree filtering tool and resources for prospective and current students.

- USU Online

Utah State University (USU) Online created a new website to better serve individuals who are looking to improve their lives through higher education. Whether prospective students need additional education to qualify for work, change their profession, or advance their careers, USU Online’s website walks them through the steps to make it happen.

“Earning a degree from a respectable university can create a major turning point in the lives of so many people,” said Rene Eborn, special assistant to the vice president for strategic initiatives. “Through the new website and marketing efforts, we are reaching people who can benefit immensely by pursuing an education through USU Online. Our goal is to ensure all Utahns have access to higher education.”

Recently, USU Online ranked 11th for most affordable online schools in 2019 by Study.com. One of the core methodologies USU Online ranked high in during the judging process was accessibility. No matter their current life situation, USU Online offers convenient access to an affordable education.

When prospective students visit the website, they can filter degrees their interests, such as education and healthcare, or by type, such as associate and bachelor’s. Another key update is the student resources page. Individuals can browse the tools and benefits they have access to as a USU Online student, ensuring they can feel supported and part of a team effort in earning a degree.
